

Columbus

Distribution of market share among the major industry players

Distribution of market share among the major industry players. IT & C and BN & T was 74% and 26% percent respectively. A further change in the economic situation in the market will be characterized by a more equal distribution of market share major players.

COMPREHENSIVE

SUPERIOR

ACCURATE

RELIABLE

Columbus allows you to search an **extensive connections network** and obtain **reliable contact information** to successfully trace missing debtors.

Columbus provides highly effective search functionalities that enable you to efficiently search for missing debtors, obtain their contact information and establish their whereabouts in the credit environment.

Our latest version, developed in JAVA and HTML5, has been implemented to radically change the way searches are done in the collections environment. Its data-centric approach means better traceability, faster response times, fewer clicks and a more competitive product to help you minimise the risk of financial loss due to uncollected debts.

HOW DOES IT WORK?

Columbus allows you to search an extensive connections network and obtain reliable contact information. With multiple ways to search an entity or person, both the Basic and Advanced Search provides you with results that are categorised according to persons, telephone numbers, addresses, employment, properties, companies, property owners, bonds and auditors.

The information presented on the searched entity or person consists of the most recent data submitted to the credit bureau by industry players. Information is updated frequently to ensure that the data is accurate and up to date at all times.

The validation process ranks search results based on matching and partially matching information. Data with the most matches compared to other data will be ranked highest. If one piece of data has more matches compared to another piece of data (validated against your search term), it will be placed at a higher ranking.

The results are ranked according to a phonetic algorithm that allocates a value for every data match. Once all the values are determined, it is collated with the data and ranked according to highest value. Rankings are allocated with a range from 0 to 100, with the best match displayed first.

SYSTEM FEATURES INCLUDE:

Basic Search, Director Search, Bond Search, Property Owner Search, Auditor Search, Wrong Party Contact, Right Party Contact, Spouse Information, Possible Relatives Information, Maps, New Reporting Graphs and Metrics, New Watch List and Watch List updates, Search Looping and an additional 30 search fields across various search categories.

BASIC SEARCH

- Requires minimal input information
- Quick search
- Best to use when search criteria is doubtful (spelling not clear etc.)
- Reduce response times by limiting the search to a particular category
- Filter your search

WATCH LIST

Experience tells us there is always a chance that you will exhaust all contact avenues when you are trying to get hold of an individual. We understand that at some point in time, you will be required to try and get hold of the individual again in the future, which is why we have come up with a solution called the Watch List.

In the event that you are not able to immediately trace your debtor, the system performs an on-going monitoring function which will alert you when additional information is uploaded on the system via data submissions.

GET MORE VALUE FROM OUR PRODUCTS AND SERVICES

At Compuscan, we are able to provide our clients with a variety of solutions to meet their specific needs. To add value to Columbus, we further provide **Batch Trace Services**.

KEY FEATURES

-  Access our comprehensive and up-to-date datasets
-  Search an entity with a single click of the mouse
-  Rely on our superior tracing techniques and efficient phonetic algorithms
-  Utilise our extensive network of data connections
-  Keep track of listed individuals and access new data when it becomes available
-  Maintain an organised record of previous searches
-  Access alternative contact details enabled by our data-centric approach
-  Integrate enquiries with Columbus to get a more comprehensive view of the consumer

KEY BENEFITS

-  Enhance your search success rate
-  Trace with ease and accuracy
-  Prevent financial loss due to missing debtors
-  Find alternative details to contact debtors
-  Remain on cue with debtors' movements
-  Monitor previous searches

Our state-of-the-art tracing tool allows you to trace missing debtors with ease and accuracy.
